Check the appropriate box to indicate the rule pursuant to which this form is being filed, and provide the period to which the information in this form applies:

- Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2021.
- Rule 13q-1 under the Securities Exchange Act (17 CFR 240.13q-1) for the fiscal year ended _____.

SECTION 1 – CONFLICT MINERALS DISCLOSURE

Item 1.01 Conflict Minerals Disclosure and Report

The Conflict Minerals Report of the registrant is filed as Exhibit 1.01 to this report on Form SD. The Conflict Minerals Report is available on our website on the SEC Filings page of the Investor Relations section of our website at www.ExtremeNetworks.com. The content of any website referenced in this Form SD is included for general information only and is not incorporated by reference in this Form SD.

Item 1.02 Exhibit

See Item 1.01.

SECTION 2 – RESOURCE EXTRACTION ISSUER DISCLOSURE

Item 2.01 – Resource Extraction Issuer Disclosure and Report

Not Applicable.

SECTION 3 – EXHIBITS

Item 3.01 – Exhibits

<u>Exhibit Number</u>	<u>Description</u>
1.01	Conflict Minerals Report as required by Items 1.01 and 1.02 of this Form.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

EXTREME NETWORKS INC.

Katayoun ("Katy") Motiey
Chief Administrative & Sustainability
Officer

Extreme Networks, Inc.
Conflict Minerals Report
For The Calendar Year Ended December 31, 2021

This Conflict Minerals Report (the “Report”) for Extreme Networks, Inc. (“we” or “our”) is provided in accordance with Rule 13p-1 under the Securities Exchange Act of 1934 (“Rule 13p-1”) for the reporting period from January 1 to December 31, 2021. Rule 13p-1 requires the disclosure of certain information by companies that manufacture or contract to manufacture products that use minerals specified in Rule 13p-1 that are necessary to the functionality or production of these products. These minerals are columbite-tantalite (coltan), cassiterite, wolframite, gold, or their derivatives, which the Securities and Exchange Commission has limited to tantalum, tin, tungsten and gold (collectively, the “Minerals”).

We have determined that certain Minerals are necessary to the functionality or production of our networking equipment. We generally manufacture our products through contract manufacturers. As a result, we do not have direct relationships with many of our suppliers. Due to the depth of the supply chain, we are far removed from the sources of ore from which these metals are produced and the smelters/refiners that process those ores. Consequently, we rely on our contract manufacturers, direct and indirect suppliers and industry initiatives for source information on the Minerals in our products.

For the reporting period from January 1 to December 31, 2021, we conducted reasonable country of origin (“RCOI”) activities followed by due diligence investigations to determine the source and chain of custody of the Minerals that are necessary to the functionality or production of our products.

We have reason to believe that a few smelters within our supply chain may be sourcing Minerals from the DRC-conflict areas. We believe that these smelters are certified Conflict Free by the Conflict Free Smelters Program. If any DRC-supported source is found to benefit armed groups in the DRC-conflict areas, we will work to remove such suppliers from our supply chain.

Company Overview

We are a leading provider of end-to-end, cloud-driven networking solutions and top-rated services and support. Providing a set of comprehensive solutions from the Internet of Things edge to the cloud, we design, develop, and manufacture wired and wireless network infrastructure equipment as well as a leading cloud networking platform and applications portfolio using cloud management, machine learning, and artificial intelligence to deliver network policy, analytics, security, and access controls. We conduct our sales and marketing activities on a worldwide basis through distributors, resellers and the Company’s field sales organization.

Conflict Minerals Program

We have established a conflict minerals compliance program that is based on the framework established by the Organisation for Economic Cooperation and Development (the “OECD Framework”) applicable to downstream companies. We engage a third party, Assent Compliance, Inc., to collect data from our suppliers. We rely in good faith on the information the suppliers provide.

Reasonable Country of Origin Inquiry

We conducted a RCOI survey of all of our suppliers. Of the 232 suppliers contacted by the Company, 156 suppliers provided valid responses to our questionnaires.

Suppliers were asked to utilize the Responsible Minerals Initiative (the “RMI”) Conflict Minerals Reporting Template (“CMRT”) to report on their usage and sourcing of materials containing the Minerals. The RMI CMRT was developed by several of the world’s leading consumer electronics companies and is generally regarded as the most common reporting tool for conflict minerals content and sourcing information. However, not all suppliers responded using the template as requested.

These surveys listed a total of approximately 333 smelters and refiners. Some of these suppliers provided information at a part number level and were able to specifically identify the smelters from which their Minerals were procured. Other suppliers provided their complete list of smelters, but were unable to identify the specific smelters from which the Minerals used for our products were procured. As some of the surveys we received are company-wide and not product specific, we believe these surveys may include smelters and refiners that do not provide the Minerals that are used in our products. Due to the use of company-wide surveys by some suppliers and the multiple levels of suppliers in our supply chain we are unable to determine with certainty at this time a complete list of smelters and refiners listed in the surveys that actually provide the specific Minerals used in our products. However, we believe the smelters and refiners used in our products may include those listed on Exhibit A.

Based on our RCOI, we believe that the sources of the Minerals contained in our products are from: (i) smelters designated as conflict free by the RMI; (ii) smelters that have not been designated as conflict free by the RMI, but that we believe are from areas other than the DRC-conflict areas; and (iii) scrap or recycled sources.

Design of Due Diligence Measures

The following are the due diligence measures we performed as a result of our RCOI:

- 1. Establish Strong Company Management Systems.** Our Supply Chain team, reporting to a Senior Vice President, oversees supply chain due diligence related to the Minerals. Our Supply Chain team communicates our Extreme Networks Conflict Minerals Policy (“Conflict Minerals Policy”) and our Supplier Code of Conduct to our suppliers and work with our third-party service provider to gather information for this report. Our Conflict Minerals Policy directs our suppliers to utilize a supply chain that does not support the conflict in the DRC-conflict areas. A copy of our Conflict Minerals Policy is available on our website at <http://www.extremenetworks.com/company/legal/conflict-minerals> and the Supplier Code of Conduct is available at <https://www.extremenetworks.com/company/csr/>.
- 2. Identify and Assess Risk in the Supply Chain.** We are continually trying to identify risks within our supply chain. Using a third-party service provider, we conduct supply-chain surveys with our direct suppliers using the Conflict Minerals Reporting Template to identify the smelters and refiners and to determine the risks of any sources from the DRC-conflict areas within our supply chain. We evaluate supplier responses for plausibility, consistency and gaps, both in terms of which products were stated to contain or not contain the Minerals, and the origin of the Minerals. In addition, we validate the information we receive from our suppliers, to the extent possible, using different procedures such as comparing different supplier responses for inconsistencies related to the same Minerals. We and our third-party service provider follow up with the suppliers surveyed, to the extent possible, on missing and inconsistent information.

In addition to direct queries to our suppliers, we utilize industry supply chain management tools and our third-party service provider to determine if there is any risk that the Minerals being used in our products are from DRC-conflict areas and benefit armed groups in these areas. For example, we check the conflict-free status of smelters and refiners on the RMI’s website.

3. **Design and Implement a Strategy to Respond to Identified Risks.** If any DRC-supported source is found to benefit armed groups in the DRC-conflict areas, we plan to work to remove such suppliers from our supply chain in accordance with our environmental standards and our Conflict Minerals Policy.

4. **Carry Out Independent Third-Party Audit of Supply Chain Due Diligence at Identified Point in the Supply Chain.** As a downstream user of Minerals, we do not purchase Minerals directly from smelters or refineries. We rely on entities closer to the smelters and refineries to conduct in-person audits. We conduct due diligence using sources such as RMI to determine the conflict-free status of smelters or refineries.

5. **Report on Supply Chain Due Diligence.** We file this report with the Securities and Exchange Commission and post it on our website at <https://www.extremenetworks.com/company/legal/conflict-minerals/>.

Steps to be taken to mitigate future risk

We take the following steps to improve the program and further mitigate any risk that the necessary Minerals in our products could benefit armed groups in the DRC-conflict areas:

1. **Compliance Module.** We have implemented a compliance module within our Product Lifecycle Management system which includes the use of a third-party service provider. The third-party service provider assists us with follow up on responses to the suppliers' surveys.

2. **Quality Management System.** We follow our Quality Management System ("QMS") process, which includes requiring compliance with the RCOI and conflict minerals disclosure processes as part of the supplier qualification and audit processes. The QMS includes a "corrective action-preventive action process" that is consistent with the OECD Framework.

3. **Work with Suppliers on Quality of Information.** We continue to communicate our expectations regarding the quality of information to be provided by our suppliers. We request that all our suppliers provide a completed and accurate RMI Conflict Minerals Reporting Template for the products that such suppliers manufacture for us that include the Minerals.

Over time, we anticipate that the amount of information globally available regarding the traceability and sourcing of the Minerals will increase.

FORWARD-LOOKING STATEMENTS

Statements relating to due diligence improvements are forward-looking in nature and are based on our current expectations or beliefs. These forward-looking statements are not a guarantee of performance and are subject to a number of uncertainties and other factors that may be outside of our control and which could cause actual events to differ materially from those expressed or implied by the statements made herein. Such factors include, among others, risks related to supply chain disruptions and component availability; macroeconomic and political and geopolitical factors; a dependency on third parties for certain components and for the manufacturing of the company's products; and the impacts of the COVID-19 pandemic. More information about potential factors that could affect the forward-looking statements contained in this Report are described in "Risk Factors" included in our Annual Report on Form 10-K for the year ended June 30, 2021, Quarterly Report on form 10-Q for the quarters ended September 30, 2021, December 31, 2021 and March 31, 2022, and other documents on file with the Securities and Exchange Commission (available at www.sec.gov). Any forward-looking statements in this Report are based on

current information as of the date of this Report, and we assume no obligation to correct or update any such statements in the future, except as required by applicable law.

DOCUMENTS INCORPORATED BY REFERENCE

Unless otherwise stated herein, any documents, third-party materials or references to websites (including our website) are not incorporated by reference in, or considered to be a part of this Report, unless expressly incorporated by reference herein.

INHERENT LIMITATIONS ON DUE DILIGENCE MEASURES

Our due diligence measures can provide only reasonable, not absolute, assurance regarding the source and chain of custody of the Minerals. Our due diligence processes are based on the necessity of seeking data from our direct suppliers and those suppliers seeking similar information within their supply chains to identify the original sources of the Minerals. Such sources of information may yield inaccurate or incomplete information and may be subject to fraud.
