[Conflict Minerals Report of Registrant, dated May 31, 2018.](#)

Extreme Networks, Inc.
Conflict Minerals Report
For The Calendar Year Ended December 31, 2017

This Conflict Minerals Report (the “Report”) for Extreme Networks, Inc. (“we” or “our”) is provided in accordance with Rule 13p-1 under the Securities Exchange Act of 1934 (“Rule 13p-1”) for the reporting period from January 1 to December 31, 2017. Rule 13p-1 requires the disclosure of certain information by companies that manufacture or contract to manufacture products that use minerals specified in Rule 13p-1 that are necessary to the functionality or production of these products. These minerals are columbite-tantalite (coltan), cassiterite, wolframite, gold, or their derivatives, which the Securities and Exchange Commission has limited to tantalum, tin, tungsten and gold (collectively, the “Minerals”).

We have determined that certain Minerals are necessary to the functionality or production of our networking equipment. We generally manufacture our products through contract manufacturers. As a result, we do not have direct relationships with some of our suppliers. In addition, due to the depth of the supply chain, we are far removed from the sources of ore from which these metals are produced and the smelters/refiners that process those ores. Consequently, we rely on our contract manufacturers, direct and indirect suppliers and industry initiatives for source information on the Minerals in our products.

For the reporting period from January 1 to December 31, 2017, we conducted reasonable country of origin (“RCOI”) activities followed by due diligence investigations to determine the source and chain of custody of the Minerals that are necessary to the functionality or production of our products.

We have reason to believe that a few smelters within our supply chain may be sourcing Minerals from the DRC-conflict areas. We believe that these smelters are certified Conflict Free by the Conflict Free Smelters Program (“CFSP”).

If any DRC-supported source is found to benefit armed groups in the DRC-conflict areas, we will work to remove such suppliers from our supply chain. As of the date of this filing, the DRC-conflict areas include: the Democratic Republic of the Congo, Angola, Burundi, Central African Republic, the Republic of the Congo, Rwanda, South Sudan, Tanzania, Uganda, and Zambia.

Company Overview

We are a leader in providing software-driven networking solutions for enterprise customers. We conduct our sales and marketing activities on a worldwide basis through distributors, resellers and the Company’s field sales organization. We were incorporated in California in 1996 and reincorporated in Delaware in 1999.

On July 14, 2017, the Company completed its acquisition of Avaya Inc.’s fabric-based secure networking solutions and network security solutions business (the “Campus Fabric Business”). Upon the terms and subject to the conditions of the Asset Purchase Agreement, the Company acquired the customers, employees, technology and other assets of the Campus Fabric Business, as well as assumed certain contracts and other liabilities of the Campus Fabric Business.

On October 27, 2017, the Company completed its acquisition of the data center business (the “Data Center Business”) of Brocade Communication Systems, Inc. pursuant to an Asset Purchase Agreement. Under the terms and conditions of the agreement, the Company acquired customers, employees, technology and other assets of the Data Center Business as well as assumed certain contracts and other liabilities of the Data Center Business.

On December 1, 2017, Company completed its acquisition of a capital financing business (the “CF Business”), pursuant to a Bill of Sale and Assignment and Assumption Agreement between the Company and Broadcom. Under the terms and conditions of the Assumption Agreement, the Company acquired customers, employees, and contracts of the CF Business.

This Report includes information related to the RCOI and due diligence measures related to the Campus Fabric Business, Data Center Business, and the CF Business (collectively, the “FY17 Acquisitions”).

Conflict Minerals Program

We have established a conflict minerals compliance program that is based on the framework established by the Organisation for Economic Cooperation and Development (“OECD”). We require our suppliers and our contract manufacturers to establish an ongoing process to determine the country of origin of any Minerals in our products.

Reasonable Country of Origin Inquiry

We conducted a RCOI on all of our suppliers. Of the 37 suppliers contacted by the Company, 34 suppliers provided responses to our questionnaires.

Suppliers were asked to utilize the Electronic Industry Citizenship Coalition/Global e-Sustainability Initiative (EICC/GeSI) Conflict Minerals Reporting Template to report on their usage and sourcing of materials containing the Minerals. The EICC/GeSI Conflict Minerals Reporting Template was developed by several of the world’s leading consumer electronics companies and is generally regarded as the most common reporting tool for conflict minerals content and sourcing information. However, not all suppliers responded using the template as requested.

Based on our RCOI we believe that the sources of the Minerals contained in our products are from: (i) smelters designated as conflict free by the Responsible Materials Initiative (RMI); (ii) smelters that have not been designated as conflict free by the RMI, but that we believe are from areas other than the DRC-conflict areas; and (iii) scrap or recycled sources.

Design of Due Diligence Measures

The following are the due diligence measures we performed as a result of our RCOI:

1. **Company Policy.** We established the Extreme Networks Conflict Minerals Policy, which has been communicated to our suppliers, which directs our suppliers to utilize a supply chain that does not support the conflict in the DRC-conflict areas. A copy of this policy is available on our website at <http://www.extremenetworks.com/company/legal/conflict-minerals>.
 2. **Surveys.** We conducted supply-chain surveys with our direct Tier 1 suppliers using the EICC/GeSI Conflict Minerals Reporting Template to identify the smelters and refiners and to determine the risks of any sources from the DRC-conflict areas within our supply chain. Supplier responses were evaluated for plausibility, consistency and gaps, both in terms of which products were stated to contain or not contain the Minerals, and the origin of the Minerals. In addition, we validated the information received from our suppliers, to the extent possible, using different procedures such as comparing different supplier responses for inconsistencies related to the same Minerals.
 3. **Follow-up on Survey Responses.** We followed-up with the suppliers surveyed, to the extent possible, on missing and inconsistent information.
-

4. **Industry Supply Chain Management Tools.** In addition to direct queries to our suppliers, we utilized industry supply chain management tools to determine if there is any risk that the Minerals being used in our products are from DRC-conflict areas and benefit armed groups in these areas. For example, we checked the conflict-free status of smelters and refiners on the RMI's website.

5. **Continual Investigation.** We are continually trying to identify risks within our supply chain. If any DRC-supported source is found to benefit armed groups in the DRC-conflict areas, we plan to work to remove such suppliers from our supply chain in accordance with our environmental standards and our Conflict Minerals Policy.

Location of Smelters and Refiners

As part of the due diligence process we reviewed surveys on the Minerals from an aggregate total of approximately 34 suppliers. These surveys listed a total of approximately 349 smelters and refiners. Some of these suppliers provided information at a part number level and were able to specifically identify the smelters from which their Minerals were procured. Other suppliers provided their complete list of smelters, but were unable to identify the specific smelters from which the Minerals used for our products were procured. As some of the surveys we received are company-wide and not product specific, we believe these surveys may include smelters and refiners that do not provide the Minerals that are used in our products. Due to the use of company-wide surveys by some suppliers and the multiple levels of suppliers in our supply chain we are unable to determine with certainty at this time a complete list of smelters and refiners listed in the surveys that actually provide the specific Minerals used in our products. However, we believe the smelters and refiners used in our products may include those listed on Exhibit A.

Country of Origin

Due to the use of company-wide surveys by some suppliers and the multiple levels of suppliers in our supply chain we are unable to determine with certainty at this time a complete list of countries of origin listed in the surveys that actually provide the specific Minerals used in our products. However, we believe the smelters and refiners used in our products may include those from the countries of origin listed on Exhibit A and that the Minerals from such smelters and mines may originate from Andorra, Australia, Austria, Belgium, Bolivia, Brazil, Canada, Chile, China, Czech Republic, Estonia, France, Germany, India, Indonesia, Italy, Japan, Kazakhstan, Korea, Kyrgyzstan, Lithuania, Macedonia, Malaysia, Mexico, Netherlands, New Zealand, Peru, Philippines, Poland, Russia, Saudi Arabia, Singapore, South Africa, Spain, Sweden, Switzerland, Taiwan, Thailand, Turkey, United Arab Emirates, United States of America, Uzbekistan, Vietnam, and Zambia. In addition, as mentioned above we have reason to believe some of the Minerals may have been sourced in the DRC-conflict areas, but that the smelters and refiners who identified these countries have all been certified as conflict free.

Steps to be taken to mitigate future risk

We intend to take the following steps to improve the program and further mitigate any risk that the necessary Minerals in our products could benefit armed groups in the DRC-conflict areas:

1. **Compliance Module.** We plan to continue the implementation of the compliance module within our Product Lifecycle Management system. Through this module, we expect to increase the response rate of our suppliers' surveys.

2. **Quality Management System.** We plan to continue to refine the RCOI and conflict minerals disclosure process in connection with our Quality Management System (“QMS”). The QMS includes a “corrective action-preventive action process” that is consistent with the OECD Framework.

3. **Work with Suppliers on Quality of Information.** We plan to continue to communicate our expectations regarding the quality of information to be provided by our suppliers. We also plan to request that all our suppliers provide a completed and accurate EICC/GeSI Conflict Minerals Reporting Template for the products that such suppliers manufacture for us that include the Minerals.

Over time, we anticipate that the amount of information globally available regarding the traceability and sourcing of the Minerals will increase.

FORWARD-LOOKING STATEMENTS

Statements relating to due diligence improvements are forward-looking in nature and are based on our current expectations or beliefs. These forward-looking statements are not a guarantee of performance and are subject to a number of uncertainties and other factors that may be outside of our control and which could cause actual events to differ materially from those expressed or implied by the statements made herein.

DOCUMENTS INCORPORATED BY REFERENCE

Unless otherwise stated herein, any documents, third-party materials or references to websites (including the our website) are not incorporated by reference in, or considered to be a part of this Report, unless expressly incorporated by reference herein.

INHERENT LIMITATIONS ON DUE DILIGENCE MEASURES

Our due diligence measures can provide only reasonable, not absolute, assurance regarding the source and chain of custody of the Minerals. Our due diligence processes are based on the necessity of seeking data from our direct suppliers and those suppliers seeking similar information within their supply chains to identify the original sources of the Minerals. Such sources of information may yield inaccurate or incomplete information and may be subject to fraud.
