Extreme Networks, Inc.
Non-GAAP Measures of Financial Performance

To supplement the Company's consolidated financial statements presented in accordance with generally accepted accounting principles, ("GAAP"), Extreme Networks uses non-GAAP measures of certain components of financial performance. These non-GAAP measures include non-GAAP net income, non-GAAP earnings per diluted share, non-GAAP gross margin, non-GAAP operating expenses and free cash flow.

Reconciliation to the nearest GAAP measure of all historical non-GAAP measures included in this press release can be found in the tables included with this press release. In this press release, Extreme Networks also presents its target for non-GAAP expenses, which is expenses less share-based compensation expense, acquisition and integration costs, purchase accounting adjustments, amortization of intangibles, restructuring expenses, litigation expenses, executive transition and overhead adjustments.

Non-GAAP measures presented in this press release are not in accordance with or alternative measures prepared in accordance with GAAP and may be different from non-GAAP measures used by other companies. In addition, these non-GAAP measures are not based on any comprehensive set of accounting rules or principles. Non-GAAP measures have limitations in that they do not reflect all of the amounts associated with Extreme Networks' results of operations as determined in accordance with GAAP. These non-GAAP measures should only be used to evaluate Extreme Networks' results of operations in conjunction with the corresponding GAAP measures.

Extreme Networks believes that these non-GAAP measures when shown in conjunction with the corresponding GAAP measures enhance investors' and management's overall understanding of the Company's current financial performance and the Company's prospects for the future, including cash flows available to pursue opportunities to enhance shareholder value. In addition, because Extreme Networks has historically reported certain non-GAAP results to investors, the Company believes that the inclusion of non-GAAP measures provides consistency in the Company's financial reporting.

For its internal planning process, and as discussed further below, Extreme Networks' management uses financial statements that do not include share-based compensation expense, acquisition and integration costs, purchase accounting adjustments, amortization of intangibles, restructuring expenses, litigation expenses, executive transition expenses and overhead adjustments. Extreme Networks' management also uses non-GAAP measures, in addition to the corresponding GAAP measures, in reviewing the Company's financial results.

As described above, Extreme Networks excludes the following items from one or more of its non-GAAP measures when applicable.

Share-based compensation. This expense consists of expenses for stock options, restricted stock and employee stock purchases through its ESPP. Extreme Networks excludes share-based compensation expenses from its non-GAAP measures primarily because they are non-cash expenses that the Company does not believe are reflective of ongoing cash requirement related to operating results. Extreme Networks expects to incur share-based compensation expenses in future periods.

Acquisition and integration costs. Acquisition and integration costs primarily consist of legal and professional fees, severance costs, and other expenses related to the acquisition and integration of Enterasys Inc. Extreme Networks excludes these expenses since they result from an event that is outside the ordinary course of continuing operations.

Purchase accounting adjustments. Purchase accounting adjustments relating to deferred revenue consists of adjustments to the carrying value of deferred revenue. We have recorded adjustments to the assumed deferred revenue to reflect only a fulfillment margin and thereby excluding the profit margin and revenue which would have been incurred had Extreme Networks entered into the service contract post-acquisition.

Amortization of acquired intangibles. Amortization of acquired intangibles includes the monthly amortization expense of acquired intangible assets such as developed technology, customer relationships, trademarks and order backlog. The amortization of the developed technology intangible is recorded in product cost of goods sold, while the amortization for the other intangibles are recorded in operating expenses. Extreme Networks excludes these non-cash expenses since they result from an intangible asset and for which the period expense does not impact the operations of the business and are non-cash in nature.

Restructuring expenses. Restructuring expenses primarily consist of accrued lease costs pertaining to the estimated future obligations for non-cancelable lease payments and accelerated depreciation of leasehold improvements related to excess facilities. Extreme Networks excludes restructuring expenses since they result from events that often occur outside of the ordinary course of continuing operations.

Litigation expenses. Litigation expenses consist of legal and professional fees and expenses related to our on-going litigation matter as a result of a securities laws class action lawsuit.

Executive transition expenses. Executive transition expenses consists of severance and termination benefits. The expenses are incurred through execution of pre-established employment contracts with senior executives. The severance and termination benefits are cash transactions, while the share-based compensation are non-cash expenses the Company does not believe these expenses are reflective of ongoing cash requirements related to its operating results.

Overhead adjustments. Overhead adjustment relate to service inventory overhead capitalization, this was a one-time event and was non-cash in nature.

In addition to the non-GAAP measures discussed above, Extreme Networks uses free cash flow as a measure of operating performance. Free cash flow represents operating cash flows less net purchase of property and equipment on a GAAP basis. Extreme Networks considers free cash flows to be a liquidity measure that provides useful information to management and investors about the amount of cash generated by the business after the purchases of property and equipment, which can then be used to, among other things, invest in Extreme Networks business, make strategic acquisitions, and strengthen the balance sheet. A limitation of the utility of free cash flows as a measure of financial performance is that it does not represent the total increase or decrease in the Company's cash balance for the period.
